

## 1. Membuat & Mengakses Database

## 2. Membuat Table Produk, Menginputkan dan Menampilkan Data

## 3. Membuat Table Kostumer Detail, Menginputkan dan Menampilkan Data

The screenshot displays the phpMyAdmin interface for a database named 'tafesunnies\_padi'. The left sidebar shows the database structure, with the 'tbl\_user' table selected. The main panel shows the table structure and the 'Columns' tab. The table has columns: id\_user (int(11), primary key, auto-increment), first\_name (varchar(60)), last\_name (varchar(60)), access\_role (varchar(20)), address (varchar(255)), username (varchar(60)), password (varchar(60)), phone\_number (varchar(30)), email\_address (varchar(30)), created\_at (datetime), and update\_at (datetime). The 'Console' tab shows the execution of a SQL query to create the table, which returned an empty result set. The 'Query' tab shows the execution of an INSERT statement, which inserted 4 rows successfully.

myadmin/index.php?route=/sql&db=tafesunnies\_padi&table=tbl\_user&pos=0
